

Low Voltage Monopoint Canopies

Welcome to Transjack and welcome to versatility!

Our monopoints use the Transjack Connector. Transjack allows Translite Sonoma low voltage fixtures to be used interchangeably with several monopoint canopies in both wall and ceiling applications.

The steps are easy.

- Choose a canopy. Size and finish vary.
- Choose a fixture (metal, fabric or glass) and select "NS" as your system option. The fixture comes complete with a Transjack connector.
- Canopy and fixture are easily assembled in the field by simply snapping the Transjack connector in place and tightening by hand.

Single Canopy (MPT1)

5.25" Round Canopy. Mounts to a standard 4" octagonal junction box (by others). For use with one Transjack enabled fixture. Fixture not included.

Ordering Code:

Transformer

N1* Integral 120v (*60 watt 12v electronic transformer)	N2* Integral 277v (*75 watt 12v electronic transformer)	R Remote
---	---	--------------------

Metal Finish

AL Satin Aluminum	PN Polished Nickel	RB Rubbed Bronze
-----------------------------	------------------------------	----------------------------

Single Canopy (MPT1A)

4.75" Round Canopy. Mounts to a standard 4" octagonal junction box (by others). For use with one Transjack enabled fixture. Fixture not included.
